## 2 Skills

## 3 Projects

### 3.1 Application Server

**stack** Scala, Akka Cluster, Akka Streams, KVS

Application server with streaming idea in its core. The integration layer for services providers which unifies the different APIs and respect the providers limitations guarding their services from unexpected usage. Unified services structure with akka-stream based IO layer and KVS distributed storage engine. Also plays as the service provider for itself to provide event streaming for sports betting and additional data store interfaces for the client application.

### 3.2 Web Platform

**stack** Scala, ZIO, Akka Cluster, PureScript, KVS

Developing and evolving Web Platform for licensees to create portals with player's account management, games hub, content-management system and integration with 3rd-party services and data providers.

It is deployed as one cluster for dozen of licensees with dozens websites. Data is stored into distributed KVS and UI is built with pure functional strongly typed language (PureScript) which produces robust and fail-safe UI. User files are handled by distributed filesystem and meta data is saved to KVS.

### 3.3 Key-Value Store

**stack** Scala, Akka Cluster, ZIO, RocksDB

KVS is highly available distributed (AP) strong eventual consistent (SEC) and sequentially consistent storage.

### 3.4 Travel App

**stack** Scala, ZIO, KVS

All-in-one application for travelers: booking, tickets, car rental, navigation, guides.

### 3.5 Frontier Web Server

**stack** Scala, ZIO

High performant, pure-functional, effect-free websocket, http and udp server, http client and telegram bot.

**code** [github.com/zero-deps/frontier](https://github.com/zero-deps/frontier)

### 3.6 Binary Serialization

**stack** Scala 3 Macros, Protocol Buffers, PureScript, LaTeX

Lightweight and fast binary serialization.

**code** [github.com/zero-deps/proto](https://github.com/zero-deps/proto)

### 3.7 Metrics Server

**stack** Scala, ZIO, PureScript, KVS

Metrics/health/logs server and client for Scala projects.

**code** [github.com/zero-deps/metrics](https://github.com/zero-deps/metrics)

### 3.8 Documentation Solution

**Stack** Scala, LaTeX, HeVeA

Documenting system and server for the applications with LaTeX-based tools for generating documentation in HTML and PDF formats.

### 3.9 Cancer Detection Software

Detection of breast cancer on early stages using machine learning algorithm modified to work with small amount of training data.

### 3.10 Optimal Irrigation of Soil

Calculation and visualization of optimal irrigation of soil for selected plants to effectively use water supply in rainless regions.
